69 DAYS PAST

206 TO COME

Where?

WHERE, in the materia medica, does the physician look for the most suitable hemogenetic?

WHERE does he find nature's hematinics, iron and manganese, most scientifically combined in shape for immediate assimilation?

WHERE is there such a preparation in a form as bland, palatable, and readily tolerable as Pepto-Mangan (Gude)?

Weather

Temp.

Fair but cold this morning  
Maude & Melba drove to school.  
John has gone to Kingsmill with  
a grist to grind. This afternoon  
John went to Aymer. Eugene  
went to Mr. Danes. Aleta Dr  
Augustine was here to do  
the black saw Wagner's  
Maude had dinner at,  
Grandmas Wright's.

Sent out 6 dozen eggs
