

September Sunday 19 1926

Slept in until six P.M. Busy day as I started  
chows as soon as I finished in the day.  
Drove Queen when I went up to see  
Jean after supper. A dandy warm  
moonlight September night and we  
sure had a lovely long drive together  
Home at 1. A.M.

Monday 20

A wonderful September day, up at  
4:45 and away early on milk route.  
Thushis were here all day but had  
a break-down at milking time so I  
had lots of help to do milking after  
I had finished my work in the day.  
Some queer weather after supper and  
retired early.

Tuesday 21

Thushis finished up about four o'clock  
Clipped cattle afterwards so we were  
late getting through milking. Alex  
and Mr. Telfer went to Caledonia after  
supper in truck after 3 new cattle.  
Arrived home 1 A.M. next morning. Wonderful  
night but didn't go up to the show

September Wednesday 22 1926

Up at 4:20, away early and home from  
milk route at 10:10 and all washed up  
at 11:45. Helped take "mads" to show  
in big truck. Busy afternoon cleaning  
and showing cattle. We won every first  
except one even if we did lose Silver Cups.  
Loaded cattle in two trucks to go to  
Woodstock at night so it was 10 o'clock and  
we were finished.

Thursday 23

Felt rather tired after such a busy  
day, the day before. Rather a  
gloomy day as it rained in afternoon  
and just rolled down in torrents  
at night, raining at least 3 inches  
or level during the night. Still  
we slept in the tent.

Friday 24

Very damp wet miserable hot  
day raining practically all afternoon  
Slept in house with Robbie at night  
as I wasn't feeling very well. Alex  
Came home from Woodstock about ten  
o'clock with the first truck load of  
show cattle. Won 5 firsts, second, 2 thirds  
and both championships at the fair.
