

November Wednesday 24 1926

They mild in the morning but turned real cold before night. Helped Roscoe load up load of turnips after I had the bottles washed. Had a chat with Jean at night and retired at 9.30. Deposited \$7.00 in bank.

Thursday 25

Did my work in dairy up after supper, then got ready and walked up to Laughlins where I met Carl and rode home with him to spend the night so I would be ready to go to Guelph in the morning.

Friday 26

Not a very pleasant morning even if it wasn't very cold. Took Jean over to Kelly's in Dad's car then we went to Guelph with Wood and Wilma in the Star in 65 minutes. Interesting time at Conference at Guelph. Attended U.F.W.P.O. dance at Williams on way home. A wonderful day with Jean.

November Saturday 27 1926

A very cold frosty day. Made good time on milk route even if I didn't get a very early start. Got load of milk ready after supper, had a swim, and went to roost at ten o'clock.

Sunday 28

Had a queer night's sleep when I didn't get up until seven o'clock. Jimmie helped me wash up when I came home so it was 8.30 when we finished dinner. Worked at my books until five and then started at chores. Had a real nice drive with Jean up home after Roscoe. Got some cider and then had a dandy lunch after a spirited debate when we went down the side road.

Monday 29

A dandy milk day and one would have thought spring had arrived. Busy day collecting some accounts and working in the dairy. Ames and the Paris Creamery raised the price of milk from 10 to 12 cents per quart.
