265 DAYS PAST

SATURDAY 101 TO COME

May 25, 1906.

Dr. Paulin, Gernersheim, Germany, says:

"The experiments made on myself with **Pepto-Mangan (Gude)** have given uniformly good results, so that I will not neglect to order the remedy. It proved particularly useful in a case of anemia following prolonged uterine hemorrhage. The percentage of hemoglobin, which was markedly reduced, increased considerably within a comparatively short time, and I do not hesitate to ascribe a large share of the effect to your remedy."

Cold. Melba & I went to
Aylmer this morning & got
Melba a shirt, & dress. This
afternoon Maudie & Alet went
to Aylmer, Alet came home
sick & is staying all night.
Eugene came over to stay
all night. John is working
on his wheat field & peas.
Marchant came & took me
down to Burwell for tomatoes
we had to pay a dollar
a bushell. Paid Dr. McHenry
in full. Harish 10
