193 DAYS PAST

172 TO COME

**For Quick Reconstruction**

of the disintegrated red cells and the creation of new ones, **Pepto-Mangan (Gude)** is especially to be recommended for the treatment of plasmodial anemia. Steady treatment with this dependable hematinic, for several weeks, is practically certain to restore hemic integrity and place the patient in a position to ward off fresh infection, or quickly throw it off if infection occurs. Arsenic may be added to **Pepto-Mangan (Gude)** when desired, preferably in the form of Fowler's Solution.

**Weather** *Very warm but* **Temp.**

*a good breeze. Mr Cox was here for dinner. The girls are going over there this afternoon. Mr. Lee & John was by weather all the afternoon. Eugene went away this afternoon & stayed the evening & had to help milk!*

*Dolly 1/2"*
