325 DAYS PAST

WEDNESDAY 41 TO COME

May 7, 1907.

Dr. L. E. Warren, Marietta, Ohio, says:

"I received the sample bottle of your **Pepto-Mangan (Gude)** and used it in a case of Anemia with general debility and eczema. The improvement is now very perceptible and satisfactory after using one bottle. Shall continue its use in this case, and shall prescribe it in all similar cases."

A dull day & rained this afternoon & raining hard to night. Maudie went to school & other ploughed all day. I mowed the second time this week to night. Had the Kaliah man here for dinner to day I have been making Maudie's old pelk dress over all the time I can get.
