

he found out in the brush heap. Frank fooled around with Lila most of the day and pulled some bind weed out in the oats. Art Guambury came over this morning to see if he could borrow the roller for Jack Martin's corn ground and Bill Philips came over this afternoon to get it. He told us that Jim Bournier has sold his place for \$6000. Dick left this afternoon for Toledo to visit Yerdie. His holidays last a couple of weeks. Hot & sunny all day.

Sunday June 7<sup>th</sup>

I lay in bed most of the day not getting up till seven o'clock but I got some chores done and drove Enah down to church. We got home and got through a light lunch early so had a long afternoon most of which I spent in sleep although I read and wrote quite a bit too. Dad and Enah talked of going for a drive till Liddum's went to sleep and then they couldn't. Frank rode his wheel over to the Mr. Phersons and made arrangements to get a skip of hus from Mr. M. Pherson when they swarm. He is to get a hive from Boyd in Simcol which will cost four dollars and the hus will cost two dollars. I may put something into it if I ever have any money to invest. He and I spoke of going for a swim to night but it got so rainy looking that we decided not to. It has

been sultry and hot all day and to night is thundering and very cloudy. It sprinkled a few drops.

Monday June 8<sup>th</sup>

We did not get a very early start this morning though we were up early and ready to begin but Mr. Monteith came for a bushel of seed corn and he visited some little time. We hauled out manure till about 10-30 when I had a break down, went through the double tree. I heard some one laugh when I went off the road and there was Bruce and Ashbaugh in a buggy on the side road they came in and stayed to dinner so we were late in getting to work in the afternoon. Frank rock his wheel down after dinner and got me some bolts and I fixed the double tree. Tobe and Herbert were busy with the garden and odd jobs while I was out with a load. Tupper came along about 5 O'Clock on his way to the mill. Toby took his load on for him and he stayed to shear sheep so I helped him and we worked till after 7 we then had tea and it was good and late before we had finished every thing.
