

Monday May 28th

I went over to Louis first thing this morning & got Queen & Dave's Doc. and harrowed Herb's ditch and cleaned out the ditches in the 80s. while Tom took the old white cow down to Wilbur's. I then hooked to the spring bath and went over the little hill by the school house. It is very grassy but I decided to sow it anyway so I am afraid if I leave it another year it will get ahead of me and have to be ploughed again. I finished cultivating it after dinner going over the end of it twice. I then harrowed it and about four o'clock went over to Louis and got old Arabian Doc & hooked on to Frank's drill. by the time I got it filled up with fertilizer and what barley I had it was after five and getting very black looking and before finished it was raining hard but I did finish about seven and got the drill in the barn. I thought I was going to run short of seed but by shutting it off a little just had enough. It stopped raining before eight and I went down town undecided whether to go to lodger band practice but chose the former. Terrible accident on the Plank Road yesterday. Young Fallon struck and killed ^{with his car} a Scotsman who was walking on the road. Cool.

Tuesday May 29th

I spent most of the fore noon cleaning the fertilizer out of Frank's drill and taking it home. I put Dave's Doc. back in the pully on my way back. It was nearly noon when I got back and I had to get ready and go with the rest of the family down to Quent's where we had a party to celebrate Harry B's birthday. Dad, Enah & Jim were there and also David. We were down town all the after noon. Tom finished ploughing the garden to-day and rolled it down & harrowed it. We took Muriel down and left her at her mother's for the after noon. I called for her on the way home. We also went up to Rosie Jones and got some plants to set out in the flower bed. Mary called Mahel over from school as it was raining and she was here for tea & all night. The Langskins called up from town to say they were home & wanted me. Campbell to go and drive them out but as Mahel was here & didn't want him to drive alone I went & got them. They or at least Mrs. Langskin thinks I am offended at them for some fool reason and wouldn't ask me. It stopped raining before dark and I went on up to Simco and took in a meeting of the Chamber of Commerce. There weren't many there. They elected Monroe Landon president.
