

He is the one Vye was advertising in the Sensational Review last year as a sensation but they took care not to mention his breeding to-day as there were too many there that know he is out of the little Postmaster's house that Stan Williams used to have. Supper was there and we came home with him. Go. night Dad & I drove down to see Aunt Alice who came home to night. Eub and the baby were down there so Dad drove them home. The baby was invited to "At Home" at John Harris Dick's this afternoon. Quint was down there and I stood at Albert's corner for about an hour talking to him. He has signed up, and is going on duty ~~and~~ has to go to Toronto for a day or so before he goes on duty. Very soft, snow has gone off a bit.

Sunday March 26th

I got around in time to go to Sunday school with Eub this morning and so of course went to church. Quint & Dick were both in church and they came over to dinner. I waited for them and we three came down town about three o'clock. Quint and I took a walk up Main St. and met Mary & Glad Law so I went around to the house with Mary for a little while and then came home to tea.

I had to come home to tend to my incubator, it doesn't seem to be running so evenly this time for some reason or other. I don't know what is the matter unless it is the oil. I went down town again after tea but wasn't in time for church. Mary, Glad Law & I went to the recruiting meeting after church. Dr. Jacques spoke and spoke well. I saw Sam Jacques in uniform to night. This has been the first Spring day we have had and the snow is nearly all gone off the roads looks rainy to night.

Monday March 27th

Spent most of the morning cleaning out the stable and the chicken house. I didn't work very fast nor do very much all day. I think owing to the fact that I have been suffering from a mild attack of Spring fever. This afternoon I took a meander through I went back and around the orchard on Frank Old's place. When I got home I went down town and got some coal oil. Dad piles the rest of the wood and threw some of the saw dust into the ice house. Go. night we set three hens. Quint left for Toronto to night. he has to go through an operation for ruptures before he
