158 DAYS PAST

208 TO COME

April 26, 1907.

Dr. W. H. Johnson, Lincoln, Nebr., says:

"My patient was suffering from nervous anemia; was much debilitated, had no appetite, etc. She began improving before the end of the first week and is still improving nicely under the remedy, **Pepto-Mangan (Gude)**.

Pepto-Mangan (Gude) is the standard preparation of the day in Iron Therapy.

Rained some today, Melba
I went over to Eugene
had dinner there & stayed
with Aunt Bell for supper
had a good time all
day. The little lamb is
sick.
