

Lennox on Monday the 27<sup>th</sup> \* A few pretty heavy snow squales [sic] yesterday, and a heavy frost this morning. reminds me that 44 years ago to day, I rode four miles in the Cutter on three inches of snow that had fallen during the previous night. The next morning the 14<sup>th</sup> it began to snow again, and continued all day, mostly melting as fast as it fell. Just at night it began to clear up, & next morning the 15<sup>th</sup>, the ground was frozen sufficiently hard to bear [sic] a horse, except where there was deep mud. The plumb & Cherry trees were in full bloom, and their fruit was blasted. The apple blows were not open yet, so that the apple crop was not affected.
