262 DAYS PAST

104 TO COME

**Tinea Tonsurans.**

The diseased surface is mopped with tincture of iodine. This is followed in a few minutes by the application of a 2 per cent. aqueous solution of corrosive sublimate. The beneficial effect produced is due to the formation of mercuric iodid at the points of contact. Goose grease is the best skin penetrant. Irritation is avoided by treating only a small portion of the diseased surface at a time.—*Sutton; Am. J. Med. Sc.*

Weather

Very cold

Temp.

John & I went to Eugene  
& I wore my fur coat, &  
I was cold, was there for  
dinner. Girls road their  
wheels to school. John  
& I was over to Mr. Lopez  
a little while to night  
John went to Eugene  
to see a man about  
forming a well. Marrah 15.
