216 DAYS PAST

Sunday

150 TO COME

Syphilo-Dermo-Urologic Aphorisms.

It should not be forgotten that a syphilitic mucous patch comes suddenly in the form of one or of several lesions. A mucous patch is distinguished from a smoker's plaque by this fact for the latter comes on slowly. The mucous patch is soft and not indurated, and whilst it looks severe it is of but short duration. When it manifests itself it is best to begin a search for other signs or symptoms of syphilis as they are very apt to be present.—*Amer. Journ. of Derm.*

Weather

A fine day

Temp.

*Maudie went & got Mrs
Lambert & Co. Brought
them out for dinner &
supper; then took them
home; Kella was ill all
day*
