175 DAYS PAST

~~SUNDAY~~

191 TO COME

**Paludal Poisoning**

results in the partial destruction of the red cells. Therefore a corpuscle constructor is always needed in the treatment of post-malarial Anemia. **Pepto-Mangan (Gude)** not only creates new erythrocytes, but also increases the hemoglobin necessary to augment the oxygen-carrying capacity of the vital fluid.

**Weather**

**Temp.**

Very nice but rained at night. Maud and I went to Kingsmill after some paint. Cecil was over and had supper. Maud took his picture. Had swarm of bees for Mrs. Merchant. Papa drew twenty-three tons of manure. Eva was over. I went over and got Cecils picture to-night. Painted all day.

SUNDAY 23

Ale + Miss Mible was here + Maude went down to Decoration with them. They was here for dinner. Caline + Maude was to church. We was all over to her boxes a little while to night. Maude 3
