Early Diagnosis of Cancer—No. 4.

Cancer of the uterus, to be cured, must be operated on early. When a woman has reached the cancer age, any leucorrhoeal discharge, or increase in one present, or any irregular bleeding should be looked upon as suspicious of cancer and carefully investigated. Any flowing or discharge coming on after the menopause is almost pathognomonic of cancer.—McGregor; *Northwestern Lancet*.

Weather

Temp.

Very cold this morning but warmer to night. Eugene & Pa went to Aylmer this morning & back for dinner. Maudie & I took Mella & Maudie went for her. Maudie & I was making Maudie's white dress. And while Maudie went for Mella & went in the woods & got enough. Had berries for the John furnished going com
