47 DAYS PAST

319 TO COME

March 16, 1907.

Najib N. Sallume, M.D., Toledo, Ohio, says:

"For over ten years, I have used **Pepto-Mangan (Gude)** in the treatment of anemia, chlorosis, and blood poverty and as a general tonic reconstructive, with gratifying results."

Dec. 18, 1906.

Dr. H. Straub Sherrer, Bangor, Pa., says:

"I cannot say anything new in regard to **Pepto-Mangan (Gude)** except that it never fails when called for."

Quite warm thawed a little on the roof. Snowed nearly all day & blew. Girls drove to school. Maudie has gone to bed at eight, with a headache. I have nearly made Melba's red skirt over. The roads are all blown full to night.
