212 TO COME

Some Common Knee Affections—No. 3.

An injury to the knee may be confined to a small area, and yet the inflammatory extension may be such as to limit the functions of the joint, producing at times a general arthritis, less frequently a simple synovitis. The point of injury is generally marked by ecchymosis at the time the physician is called, and a little palpation will determine the exact focus of injury.—Hunter; *Mass. Med. Journ.*

Weather

Temp.

Very hot

Maudie went to church
& took Maude & Thompson.
Then after dinner, Maude
& Helba went over to
Evelyn's & stayed for supper.
Then Evelyn came home
with them
