20 DAYS PAST

345 TO COME

Treatment of Felon.

Incision (under nitrous oxide) before suppuration begins strongly advised. Make it parallel with and close to nail, in line of skin furrows, thus forming a flap of tip of finger. Insert rubber tissue or gauze with petrolatum in uppermost angle of wound and dress with normal salt solution, maintaining constant moisture. On third day packing comes away and no further packing is necessary, wound soon closing and finger resuming usual size and shape.—Dorrance.

Weather

Temp.

A fine day
Sawed a very little last evening
John went to mill this
morning. This afternoon, he
went to Aybun with Mark
Clarence to a telephone
meeting. To night he drove
Estell McFarland home for
a few minutes. Estell &
went to Aybun this afternoon
with George Davis & home again
with him. An awfully small fire
scare. Billy & Polley 13 Dal. 7 1/2
