86 DAYS PAST

279 TO COME

Acute Appendicitis.

Treatment. After operation in children: 1. Give warm saline solution by-rectum, 8 to 10 ounces every two or four hours; administer slowly with catheter and funnel. 2. Feed with a decoction of crushed raisins, alternated with albumin water. 3. Open bowels as soon as possible. If no normal movement within twenty-four hours, give glycerine enema; use syrup of senna as routine aperient.—*Stiven.*

Weather

A fine day

Temp.

We papered the two summer
kitchens & Joe cleaned it all
up. Maudie & Stella went to
Aylmer. Stella was down to
to visit - Wilfred this afternoon
then went from here to
Aylmer with Maudie. John
has visiting this morning &
again all the afternoon.

Clarence was over to night
& spent the evening. Alva
was in a few minutes on
her way from Aylmer. Billy's
