

#110⁰⁰ which I thought would square up but I was
grieved to learn that I owed him \$36.⁰⁰ Frank went
back home and turned out a load of wheat. We then
went back to move the piano. We got Goodwin, Frank
Aude & a new man from Jack Martin's and Mr. Bayley
was there taking some wardrobes apart so we had
lots of men but it was quite a lift. We couldn't
get the legs off it so had to worm it through the doors.
They are getting things ready for the sale over there.
We didn't get back much before noon. After dinner
we hauled in four bags of wheat. It was damp
but we thought it would do. Landon Deen would
Frank to go over and rake the wheat stubble and we
let him have the rake and Joe Long raked it. They
finished raking today. Jack Martin is over at
Syracuse with some chickens they tell me he took
one or two of my old hens over there to the show. Hat.

Thursday August 12th

We went out this morning and turned out all the
wheat. We then went back across the gully and put
on a load of the poorest hay which we spread on the
rails over the bulls and over the granary. As there was
a heavy fog and wet this morning, we didn't get started
very early so it was noon by the time we got our
load off. This afternoon we hauled in the wheat

which was in fairly good shape to go in. we figured
there were about seven decent sized loads although
we made more trips to the field than that. There will be
a lot of raking. I went down to band concert to night.
and the rest all ~~came~~ down to hear it. Roy & Vernon
and the children are at Auntie's so we stayed there for
quite awhile. Ernie was over at Mrs. Battersby's
sale all the after noon. It was a big sale and a big
crowd. Sid. was down playing with Rebecca all the
after noon and stayed down to bed. Very hot and muggy.

Friday August 13th

Frank went out and raked the wheat stubble this morning
and we got a good sized load of raking off it. It took
longer to rake it than Dad had figured on so that we
didn't have time to go back and get any hay before dinner but
we got the wheat raking in before noon. While Frank
was at that Dad and I put off the load of wheat that was in
the barn and then as I had a pain in my tummy I
lay down till we hauled in the raking. We went back
after dinner to haul hay. We got one load up and
another one half on when it began to rain. We came
up with our half load but got drenched doing it. I
spent the rest of the after noon painting show card
practice and Frank washed out our wet clothes. Very
warm today before and after the rain.
