

Blood Vitality

The essence of life is the blood. The vital element of the blood is hemoglobin. *Without* a normal percentage of this elementary principle the tissues are insufficiently oxygenated and poorly nourished. *With* a proper proportion, the vital functions are quickened and the entire system fortified.

Pepto-Mangan ("Gude")

is a hemoglobin producer, because of the quickly assimilable organic iron and manganese which it contributes to the devitalized circulatory fluid existing in cases of Anemia, Chlorosis, Amenorrhea, Dysmenorrhea, Bright's Disease, Chorea, etc.

Sold in eleven ounce bottles only; never sold in bulk.
