53 DAYS PAST

312 TO COME

### Anemia from Menorrhagia.

A physician of Glasgow, Scotland, reports: "I prescribed **Pepto-Mangan (Gude)** for a young married woman who was very anemic from menorrhagia, and who said she had tried many things but could find nothing that did her good. On her return after four or five weeks I was impressed with her improved appearance, as well as her buoyancy of spirits, and, generally speaking, the beneficial results of its administration."

Weather

Very cold

Temp.

5 below

The girls came home tonight  
Eugene went for them. Carl  
came for tea also he was  
down to Jaffa Sunday school
