354 DAYS PAST

THURSDAY

12 TO COME

To Prevent Postoperative Nasal Hemorrhage.

Shrink the tissues with adrenaline chloride solution one to 1,000, cocaine parts with ten per cent. cocaine solution, cut with scissors or snare the hypertrophied tissue, cauterize with electrocautery the cut surface only, then pass over with 100 per cent. silver nitrate solution on an applicator.—Schwartz; *New York Med. Journ.*

Weather

A fine day

Temp.

Mr. Lopez picked their geese
I bought three of them
they cost \$6.12. I helped the
pick some. John sold a
load of hair. Cecil was over
to night. Melba took Grace
as far as the corner & then
went to Apliner for her.
I washed & habbed & are
wringing to night. My old
her mother in law helped &
Clarence & Eva to pick geese
