265 DAYS PAST

100 TO COME

The Over-worked Neurasthenic

does not require temporary stimulation, but general vital reinforcement. **Pepto-Mangan (Gude)** is especially adapted to the needs of these patients, as it is entirely devoid of the objectionable features of most iron preparations. It is distinctly pleasant, free from harsh action upon the stomach, and does not constipate.

Weather

Temp.

a little frost
last night but warmer today
John and helping mark this
morning to build fence, then
helping shed pick corn after
dinner, I took Corlin over to
Aunt Belle for Elderberries
after dinner. Hattie & Lillian
came home with the girls &
make my coat. It rained
a little last night. I have
a terrible tooth ache.
