Wednesday, April 12

92 DAYS PAST

274 TO COME

April 20, 1907.

Dr. Geo. N. Brown, Hebron, Ohio, says:

"I received your sample of Pepto-Mangan (Gude) and obtained surprising results from it in a case of persistent anemia. I am daily prescribing the preparation and receive results from it that I could not get from any preparation that I have ever used. Will continue to prescribe it in all cases of anemia and kindred conditions."

A terrible rainy day.  
rained all day until about  
four. then it turned colder  
Girls drove to school. I am  
a little better. John was  
down to S. Hed's this afternoon  
I finished some lace for  
Aleta
