53 DAYS PAST

313 TO COME

An Efficient Aid.

Efforts directed toward the restoration and regeneration of a more or less depleted vital fluid are always in order during convalescence from an acute or exhausting disease. Pepto-Mangan (Gude) is an efficient aid toward such restoration, as it assists materially in compensating the blood deficiency which so often delays or postpones convalescence.

Weather

A lovely warm

Temp.

day thawed considerably. I helped John hitch the black colts to the sleigh, & we took out two loads of manure this afternoon. The nurse stayed with Maudie. Laura M^r Blenman came for nurse to night and took her to an entertainment in the hall. Maudie is still getting better.
