141 DAYS PAST

224 TO COME

The Plasmodial Invasion

of paludal disease results in the partial destruction of the red cells. Therefore a corpuscle constructor is always needed in the treatment of post-malarial Anemia. **Pepto-Mangan (Gude)** not only creates new erythrocytes, but also increases the hemoglobin necessary to augment the oxygen-carrying capacity of the vital fluid.

Weather

Temp.

Rained to day in the morning. I drove the girls to school. Then John & I went to Clymer & John got his hair cut⁺ & brought⁺ the girls home. The men fixed fence.
