

December Monday 6 1926

December Thursday 9 1926

A cold bright sunny day. Heavy snowfall of the day before made it pretty heavy going for "Dollie" and I but what did I care when I was happy with the thoughts of completing my term as an M.P. and being a married man in the spring.

Felt rather tired after working late the night before so didn't get up very early in the morning so naturally I had to stop some to get my work done by supper time.

Tuesday 7

Friday 10

Another fine day and a little milder but not quite so bright. Spent a busy day on the milk route and working in the dairy the remainder of the day.

Roscoe and I drove to U. F. P. O. meeting in Mansfield. Rate getting started as usual this time due to the president. Part of the programme failed to show up but we had an enjoyable evening and a boys social afterwards. Jean was there and Jack brought home to Bendemeer with the girls in his Ford. Gave my report of the conference at Sulphur.

Wednesday 8

Saturday 11

A mild morning and with lots of ice it was pretty slippery. Took trip and run on newly painted milk sleigh for first time and made good time. At night Roscoe, Jimmie, and I drove up to Barkers and clipped their six cows so it would be easier for Jean to milk them. Drove feed of ice cream. It was here we finished after 12 P.M.

Wash day and as usual a busy one for me. Mrs Bailey went away in afternoon so five of us batched it for supper and maybe we didn't have a queer feed of beans followed by stunts in our gym. Lapped up bottles ready for Sunday, had a swim and retired at eleven o'clock.
