

May Wednesday 4 1927

Plowed root ground all day with "Egg and Fly" and sure turned over a lot of ground. At night Jean, Dan, and I motored to town and spent a very pleasant evening at Eleanor's and Cousin Melville's was there too and feeling full of the old "kick"

Thursday 5

Spent the biggest part of the day between the plow handles. At night Dan, Jean, and I drove to Paris to get "Harry" the new German police puppy when he came in by express. Real part of the story "King John of the Great" in the Ladies Home Journal before we went to roost. Eric Laughlin and F. Campbell called on me.

Friday 6

Out and planted five short rows of Irish cobbler potatoes in the garden then rolled until noon. Renewed my Ontario Farmer subscription. Spent the afternoon fencing the river and thereabouts and it sure was a wonderful day for the job.

May Saturday 7 1927

Rolled in the root field in the morning then harrowed in the garden till noon. Then after dinner I scratched away in the sod field by sheep pen and then up along the lane. Jean helped me grass my horses after supper, then we did the dishes, listened to the "Wings" on the radio and I had a bath and we went to roost.

Sunday 8

Had a hurried trip to the flats with Jean before church time after some flowers. Big crowd at Mother's Day service at Church. Honored my mother by having dinner with her and then attending Sunday school with her at the mission where Jean and I attended A.S. together for the first time. Home and did the chores after and then wrote a letter to Harry Wren at night.

Monday 9

Thunderstorm came up and it started to rain about five and it sure did rain until about ten o'clock when it cleared up for the day. Chased around in the morning took "Egg" to Canning and got her shod and some other work done. After dinner and as I brought two bags of "Spuds" down from home got back just in time to help finish milking and turn the separator.
