269 DAYS PAST

96 TO COME

Pronounced Pernicious Anemia.

A London, Eng., physician writes as follows: "The case is one of pronounced pernicious anemia in a man of 67, who has marked intolerance of arsenic, which, in minute doses, caused gastric irritation and had to be abandoned. The patient was able to take and absorb Pepto-Mangan (Gude) which is entitled to credit for the improvement made under its use."

Weather

Temp.

Cold all day
John & Mellas was to Oyl
I canned corn & did my
peaches & made grape
jelly. John & Joe drew
manure this forenoon
Joe spread this afternoon
Joe to Kingsmill to night

Billy $2\frac{1}{2}$ Polly $7\frac{1}{2}$ Dolly $2\frac{1}{2}$
