

Jack's to borrow a crate to ship some old hens. Frank called and got it on his way home. Dad. hoed thistles in the corn. Later Frank drove down to get some gasoline for Gundry who has been working all day out here grading our road. Enah and Sid were down at Aunt's picking berries this morning. I went down to band practice's night very few out. Kael got the first of our steers this morning.

Tues day July 27th

Frank and I took my old hens over to Jack Martin's this morning. There were just 16 of them and he gave me \$23.00 for them after he weighed them up. He had promised some fellow a couple of dozen Culls but hadn't culled him out so he said these would do as well. We hauled two more loads in this morning taking all the hay there was out. This afternoon Dad. cultivated and hoed the potatoes and mangels and in the garden. I helped Frank grind a mower knife and then thinned some more turnips. Frank started to cut the rest of the hay on this side of the gully. He killed an old hen for Aunt Alice this morning evening and he took it down to her.

Wednes day July 28th

Frank cut hay all day. He finished all there was on this side of the gully before noon and after dinner I helped him grind a mower knife and he cut all the after noon

on the 12 acre piece across the gully. Dad. hoed potatoes all morning and I hung around here till Karl Coleman came about ten o'clock and got Frank's steers which we shut in for him. I then went out and thinned turnips till noon. I finished them soon after dinner and then took the little team and raked up what Frank cut yesterday what Dad. cocked up. He and Frank cocked up some more after tea as it looked like rain to night. I went down town with Aunt Alice's cream. Enah went over to call on Tom & Mark's house keeper and Mrs. Harvey Evans also Mrs. Cam M. Bride and Mrs. Jway. Fine & warmer.

Thurs day July 29th

Frank finished raking on this side of the gully this morning and then went over and raked up Jway's and raked theirs up as Landon was over this morning to ask him. After dinner he went back and raked what was cut across the gully and then helped Dad. & me cook up. We cooked up all day and got nearly finished. It was quite windy this morning and very hard to cook as the blue grass is so short and heavy. About five o'clock it began to rain and we had quite a sharp thunder storm. I went down to band concert to night.

Friday July 30th

It was too wet early to haul hay or work at it so Dad.
