### Diseases of the Pleura in Adults.

In exploratory punctures of the pleura a failure to obtain fluid does not always free this cavity from suspicion: we may be dealing with plastic pleurisy. In such case, there may be a suspicious "feel" to the experienced hand. It may be evident that the pleuræ are often gritty or otherwise thickened.—Williams; Med. World.

Weather

Temp.

Warmer & fine  
Maudie took Melba to school & went  
this afternoon & took her lesson  
& brought Melba home. Maudie  
& I papered the kitchen to  
day & this after noon made pie  
Maudie is burning wood to  
night after she washed the  
dishes & I picked two chickens  
John & I drew a few loads  
of manure this morning.  
Pa has been visiting most of  
the afternoon.
