

wed. Crossed, met the bus and started for St-George.
Mr & Mrs Dunscombe's Mr & Mrs Little arrived
Mrs Frith & Mrs Ashcombe. When we reached
Walsingham Caves we stopped for lunch. The
driver acted as our guide and guided us
through the caves illuminating them with
palmetsto. Growing in front of the 1st cave was
a coffee tree the flowers of which were lovely both
in appearance & perfume. Doves' Catalach tree
was also near it. The Stagnatites were very
pretty and the water in the 1st cave 40 ft
deep but so clear that you could see the
bottom quite distinctly. The second cave was
full of Stagnatites but a passage went
right through it so that we went in at one
side and out at the other. We had our lunch
in an old house close by a little pond & then
resumed our journey to St-George passing
over the great causeway. We went to Mr
Frith's in St-George and he and Mrs Frith
kindly showed us the sights of the town. 1st
The gardens, a tablet erected to Sir George
Sakers 1609 first catches the eye. a Cereus
palm and a monkey puzzle tree are two
