282 DAYS PAST

TUESDAY

84 TO COME

EXSANGUINATION.

Loss of blood through accident, hemorrhage, surgical operation, or other cause, may be quickly and successfully combated by the administration of **Pepto-Mangan (Gude)** which rapidly builds new blood, increasing the number of red corpuscles and amount of hemoglobin, and acts as a stimulating nutrient tonic and reconstructive.

Being an organic preparation of iron and manganese, neutral in reaction, **Pepto-Mangan** is readily borne by the weakest stomach.

Cald girls stayed with the
leaverly girls all night. I went
for them to school. I went &
got some corn & cut it off
to do up. Lewis was here a
few minutes this morning.
I was in to Mrs. Liles.
John has been cutting corn
all day.
