Prognosis in Acute Pleurisy.

I suppose we shall all agree that patients who have had one attack of acute pleurisy with effusion and have been tapped once or twice, or not tapped at all, usually leave the court without a stain on their characters. They are admissible by insurance companies at normal rates, and the only record that remains (and that not always) is a slight departure from the normal physical signs, and perhaps of the mobility of the side that has been affected.—Rickman J. Godlee; Clin. Jour.
