337 DAYS PAST

Tuesday

29 TO COME

If Sufficiently Prolonged,

sepsis, pre- or post-operative, leads to anemia, as does also long continued suppuration or post-operative hemorrhage. After the cessation or removal of the operative cause, **Pepto-Mangan (Gude)** can be depended upon as the ideal hematic in the reconstructive treatment of such cases.

Weather

Temp,

Cold & blowing all day & snowing off & on all day. Melba & Bobb Grace & 90⁺ old Marias never slips on. Then Melba went for them, John & Eugene went to Mr Leung's hells sale, we washed. Eugene was here for supper.
