Sunday, May 28

149 DAYS PAST

217 TO COME

 The Direct Loss of Blood

caused by acute hemorrhage must be compensated for. First of all, by saline infusion to replace the volume of fluid, and subsequently, by recreation of red cells and hemoglobin. Pepto-Mangan (Gude) is the most available agent for the latter purpose, as it is so readily tolerable and immediately absorbable as to insure the rapid and complete assimilation of its blood-building ferruginous and manganic elements.

Weather

Temp.

a fine day

Maudie went to Sunday
 school & I went out
 to see Alice Arnold.
 Herbert & Kenneth
 came home with
 us
