212 DAYS PAST

154 TO COME

Pulmonary Edema.

Grober emphasizes the importance of stimulating the heart action, relieving it of some of its task by venesection in case of the full blooded, and by revulsion. Expectorants and narcotics are seldom needed, as there is already sufficient impulse to cough, and the usual accumulation of carbon dioxide in the blood has a narcotic action. These may fail, however, and each case should be studied individually.—*Deutsch. Med. Woch.*

Weather

Temp.

One of the hottest ¹¹⁰
days I ever saw one
hundred in the shade
4 in 4 & I was home
all day. Celsius was
down to 40 in Abell.
Temperature in Toronto
108 five deaths, 90
in Chicago
