

Sunday, February 6

37 DAYS PAST WEDNESDAY 329 TO COME

The Vital Solvency

of the patient must be maintained at all hapards: Anemia must be combated and nutritive reenforcement encouraged and increased. Pepto-Mangan (Gude) begins at the foundation, by increasing the vital element of the blood, thus indirectly hastening absorption and insuring the assimilation of the patient's nourishment.

Weather Snowed quite a Temp.

lot last night & all day to day
it was a wet snow & has thawed
some, but cloudy all day.
John & Melba went to Aymer
for the mail, John was down
to Clarence Copes this afternoon
Maude & Melba didn't go to
school they wasn't either of
them very well. Mark had
fair of this young calves &
Clarence last one.
