

down to church. It was Mr. Leigh's last Sunday so Dad. wanted to say good bye to him. It has been very cloudy and has rained several times during the day but not hard.

Monday September 6th

It was too wet to cut Dad. thought this morning so he drove Aunty, Aunty Alice & Sid. up to the cemetery. I cut lawn most of the morning but wasted a lot of time with Dick who as it was Labor Day got a holiday. This afternoon I got ready and went down about four o'clock to a picnic. The Ever-ready Club were having down the lake shore, we had a great time and nearly every body in town was down there. We had a lot of fun but it looked rainy so we got home early. Most of them went over to the pavillion to the last dance of the season but I went around home with May. for awhile and intended going to the dance but it was beginning to rain when I started for home and I was a little tired so I thought I wouldn't go and walked part way home with Charlie Guanbury and borrowed his upbealla. As it was raining but it didn't amount to much.

Tuesday September 7th

Frank started back to school this morning in high spirits his passing Entrance must have created a high degree of

interest for study in him, because he didn't have to go back unless he wanted to. Lela M: Bride is assistant in the High School this year so likely she will make them toe the scratch. Dad. & I started to plow this morning. Dad. plowed four or five rounds in the little gully in the clover sod next to the orchard & then I took it till noon. The north side of the hill is very hard & chunky and it is all most impossible for me to hold the plow in the ground but the south bank plows nicely. This afternoon Frank didn't have to go back to school as we expected and so we went back over the gully and cut oats. we had to ride the table going around the side hill, we didn't get very many rounds cut as we broke the double trees when the big wheel dropped into a ditch on the side hill, they were Sam Law's too, we had broken a hook on one of ours & Dad. went over and took Sam's off his binder which was back in the field. Bert Meinroe came over this morning and borrowed the disks for Sam. Mrs. Harding died last night. It has been fair & hot all day.

Wednesday September 14th

I have got so behind with this through neglecting to write that I cannot remember what we did day by day. but I know we got all the oats cut across the gully and left them as they dropped from the binder thinking they would dry out.
