106 TO COME

## Normal Construction and Reconstruction

requires a competent circulating fluid, i.e., blood with a sufficient number of erythrocytes of structural and functional integrity. In anemic conditions **Pepto-Mangan (Gude)** stimulates the formation of normal red cells, increases the hemoglobin percentage and acts as a general reconstituent.

Weather

Temp.

Very warm from London fair  
Joe came home this morning  
at seven, he said that he came  
home on the nine sixty five  
the car. I took the girls away  
for them, got a basket of peaches  
for myself & two for Alex, then  
to night - got myself another  
basket - said left this morning  
sixty to night. Men was  
bunching up rats. In boy came  
& helped them then they drew  
up wood for to the ash, Jim  
Thompson, Boyde & Jim Achar's  
are all gone to London March 14
