299 DAYS PAST

Saturday

67 TO COME

When Vigorously Pushed

in post-malarial anemia, as well as in the anemia resulting from many of the severe destructive blood infections, **Pepto-Mangan (Gude)** builds new erythrocytes rapidly and certainly, and aids materially in the desired increase of hemoglobin. No untoward effects upon appetite, digestion, nor any of the vital functions are ever noted as a result of its administration.

Weather

Temp.

Rained hard
John plaug head when
it didn't rain, Ann &
Jepple & Melba went
to Cypher, Dr Davis
was here to find out
what killed Mellas
Dorset Cornub.
