118 DAYS PAST

248 TO COME

Geriatric Aphorisms—No. 11.

Chills are rare and serious, chilliness is frequent and of no consequence. A disease beginning with a chill is always grave.

A high temperature is always grave; a sudden drop usually precedes death.

Typical temperature curves such as are found in typhoid fever, and malaria, are rare in the aged.—*Nascher; Amer. Med.*

Weather

Temp.

Cold this morning
grew warmer, then about
three it rained, and got
much colder. Maudie & I
drove to St. Thomas. Got
Mella a new carderay coat
had lots of fun. Evelyn
was over shed & Albert were
up
