

Pepto-Mangan ("Gude")

Is an IDEAL FERRUGINOUS TONIC, because:

It rapidly increases the number of red corpuscles and the percentage of hemoglobin.

It does not irritate or derange the digestion.

It is distinctly palatable—a point of importance in treating women and children.

It does not constipate.

It does not affect the teeth.

It is the STANDARD HEMATINIC, because:

It contains an appreciable dosage of both iron and manganese, in a neutral organic solution, as true peptonates.

It undergoes no chemical change in the stomach and is ready for quick absorption and rapid infusion into the blood.

It is thus of marked value in Anemia, Chlorosis, Rickets, Chorea, Amenorrhœa, Dysmenorrhœa, Neurasthenia, Bright's Disease, Convalescence, etc.
