105 DAYS PAST

261 TO COME

A Veritable Prop.

To revive, restore and reconstruct one should preferably begin at the foundation. In almost every case of systemic depletion the blood is "below par." There is no quicker and more satisfactory way of starting up the reparative process than by means of **Pepto-Mangan (Gude)**. This palatable and tolerable combination of iron and manganese in organic form is a veritable "prop" to the functionally disturbed blood.

Weather

Temp.

Chilly & awfully muddy  
rained hard last night &  
sprinkled off and on all day  
Charley & Startupp washed a large  
washing for five quilts, besides  
the other washing. Maudie took  
Melba to school & they were  
both to Mrs. Selmes for dinner.  
John was visiting Mark this  
forenoon. This afternoon, he &  
Charley have been cutting  
up at least 2 splitting wood
