207 DAYS PAST

158 TO COME

The Anemia of Bright's Disease.

℞ Liq. Potas. Arsenitis. (Cc. 4.0-8.0) ʒi-ʒij  
Strychnia Sulph. (Gm. 0.02) gr. ¼  
Pepto-Mangan (Gude). (Cc. 330—original bottle) ʒxi  
M. Sig.—Tablespoonful after each meal. Children in proportion.

Weather

Temp.

Very warm. Mella was  
down to Mrs Bingham's  
house this morning & Wilfred  
was up this afternoon.  
His Pa & Ma went over to  
see Mr & Mrs & then Mella  
took him home on her  
wheel. Wilfred's foot was  
a little better today. Eugene  
has gone away. Mella's old  
pink goose died last night.
