## The Care of Surgical Patients—No. 3.

Patients deeply jaundiced are bad surgical risks and if the jaundice is transitory operation should be delayed until it has almost disappeared. The coagulation time of the blood is the most accurate indication we have as to advisability of operating, but it is also true that changes in the blood vessels themselves are more or less responsible for their tendency to bleed easily.—*Balfour; Mayo Clinic, Med. Record.*

Temp.

A fine day  
I drove the girls to school  
& then came home for  
crabs & took them back & went  
for them. Eugene and  
Aleta was here on their way  
to Aylmer & on their way  
home, but wouldn't stay  
for dinner. John has been  
ploughing his corn fields  
all day. We washed clothes  
got dry. Mariah 14 Polly 1/2 Polly 2
