179 TO COME

Gastric Ulcer.

The best method of using silver nitrate in the treatment of gastric ulcer, according to Einhorn, is to give 1/3-1/2 grain of the drug dissolved in a half-tumbler of distilled water one hour before each meal. The patient should immediately lie on his right side, on the theoretical ground that most gastric ulcers are situated in the region of the pylorus.

Weather

Temp.

Wed, rained  
last night - & some today  
The girls & I washed, John  
had Mark over helping  
him fix his hayrack  
then he drew two loads  
of gravel besides, Joe  
has gone to the concert in  
the Baptis! - Church Maunds  
& Gene & I was to give  
& Jessie gave them some near
