127 TO COME

Purulent Otitis.

Boric acid, 1 dr., Subnit of bismuth, 1 dr., Benzoic acid, 10 gr., Formol, 2 drops, Glycerine, 1 oz. The ear should be syringed morning and evening with a warm infusion of tea or camomile. The canal should then be filled with the above mixture, which should be allowed to remain ten minutes, the head being inclined to the healthy side. The liquid in excess should be removed with a plug of absorbent cotton.—  
Med. Press and Circ.

Weather

Temp.

Cold, had to build a fire to night. Girls went to the Harley Marchants & got some coal trucks. Then this afternoon I went to Mrs. Bliss & she helped me with my black dress. Joe helped Eugene build his oat stack, John drew in one load of oats that Joe cut with a scythe, then ploughed all the rest of the day. Mr. Cooper's old nettle has lock found to night. Lewis has one with embolism. Mariah 13
