217 DAYS PAST

Monday

149 TO COME

Profuse Blood Loss

from acute hemorrhage must be compensated for. First of all, by saline infusion to replace the volume of fluid, and subsequently, by recreation of red cells and hemoglobin. **Pepto-Mangan (Gude)** is the most available agent for the latter purpose, as it is so readily tolerable and immediately absorbable as to insure the rapid and complete assimilation of its blood-building ferruginous and manganic elements.

Weather

an nice day Temp.

Raining to night, we washed John helped me Mauchie went to Oylum for binding tomie, had to pay twenty seven dollars a hundred for it brought Mr Chute home with her for half a day, at noon of this afternoon they started cutting rails March 6
